

Experiment 5: UI Design Lifecycle Using RAD Model

Name: Loga Prabha GB

Roll No: 240701290

Aim

To simulate the lifecycle stages of UI design using the RAD model and develop a small interactive interface.

Objective

- To understand the RAD model.
- To design an interactive UI prototype.
- To develop login, signup, and product screens.

RAD Lifecycle Stages

1. Requirement Planning

User requirements such as login, signup, and product display are identified.

2. User Design

Wireframes and UI screens are designed with navigation and interactive elements.

3. Construction

The interface prototype is developed with buttons, text fields, and product cards.

4. Cutover

The prototype is tested for usability and navigation.

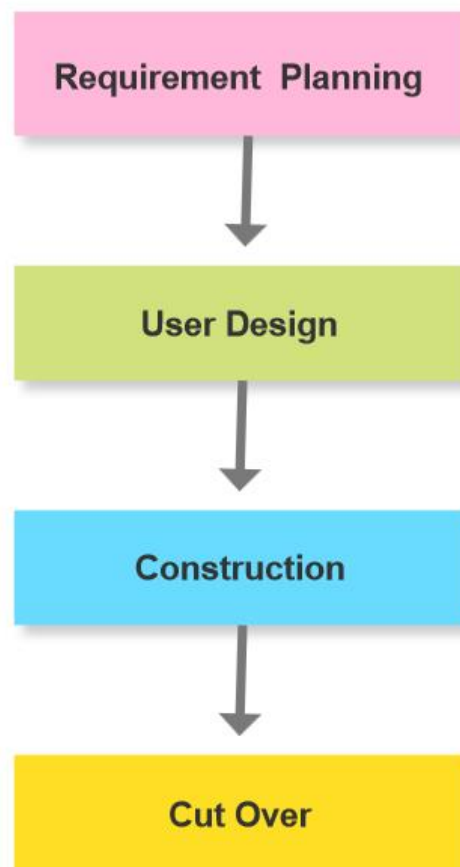

Interface Description

The interface contains:

- Login screen
- Signup screen
- Product display screen
- Product detail screen with Buy Now option

HCI Principles Used

- Consistency
- Simplicity
- Visibility
- Feedback

Result

The interactive interface was successfully designed using the RAD model and provided smooth user interaction.
